
Linux device drivers for MEMS motion and environmental sensors (Input framework)

Data brief

Features

- Linux device drivers for Input framework
- SPI and I²C interfaces supported
- Available in the STMicroelectronics public GitHub repository

Description

Linux device drivers for STMicroelectronics MEMS motion and environmental sensors, based on the Linux Input device system, are available in source code in the STMicroelectronics public GitHub repository.

The repository contains the Linux kernel (v3.10, v3.4) with STMicroelectronics MEMS sensor support; the sensor drivers are located under the directory `drivers/input/misc/st` and organized by sensor type. The sensor drivers support SPI and I²C interfaces.

Integration details are available in the README section of the GitHub repository.

Revision history

Table 1: Document revision history

Date	Version	Changes
20-Jun-2017	1	Initial release
19-Sep-2017	2	Removed Android sensor Hardware Abstraction Layer (HAL)
