

## WeSU over-the-air device firmware upgrade

Data brief

### Description

The ST BlueDFU app allows WeSU (STEVAL-WESU1) boards to receive firmware images over-the-air from a smartphone and write them to the STM32L151 Flash memory. This functionality is enabled by BlueNRG-MS, Bluetooth low energy wireless network processor.

Refer to the STEVAL-WESU1 user manual for ST BlueDFU use procedures.

### Features

- Upgrade WeSU firmware easily through your smartphone
- No leads or physical connections
- Available at Google Play™ and Apple™ app stores

# 1 Revision history

**Table 1: Document revision history**

Date	Version	Changes
17-Mar-2016	1	Initial release.
16-Jan-2017	2	Updated title on the cover page, minor text changes in description.

**IMPORTANT NOTICE – PLEASE READ CAREFULLY**

STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, enhancements, modifications, and improvements to ST products and/or to this document at any time without notice. Purchasers should obtain the latest relevant information on ST products before placing orders. ST products are sold pursuant to ST's terms and conditions of sale in place at the time of order acknowledgement.

Purchasers are solely responsible for the choice, selection, and use of ST products and ST assumes no liability for application assistance or the design of Purchasers' products.
