

STM32Cube MCU Package for STM32F7 Series with HAL, low-layer drivers and dedicated middleware

(1) The set of middleware components depends on the product Series.

Product status link

[STM32CubeF7](#)

Features

- Consistent and complete embedded software offer that frees the user from dependency issues
- Maximized portability between all STM32 Series supported by [STM32Cube](#)
- Hundreds of examples for easy understanding
- High quality HAL and low-layer API drivers using CodeSonar[®] static analysis tool
- TouchGFX graphics software stack
- STM32F7-dedicated middleware including USB Host and Device, and TCP/IP
- Free user-friendly license terms
- Update mechanism that can be enabled by the user to be notified of new releases

1 Description

STM32Cube is an STMicroelectronics original initiative to significantly improve developer productivity by reducing development effort, time and cost. STM32Cube covers the whole STM32 portfolio.

STM32Cube includes STM32CubeMX, a graphical software configuration tool that allows the generation of C initialization code using graphical wizards.

It also comprises the STM32CubeF7 MCU Package composed of the STM32Cube hardware abstraction layer (HAL) and the low-layer (LL) APIs, plus a consistent set of middleware components (RTOS, USB, FAT file system, Graphics and TCP/IP). TouchGFX graphic software stack is also included in the STM32CubeF7 MCU Package as a part of the STM32Cube ecosystem. It is available free of charge for production and redistribution on STM32 microcontrollers. All embedded software utilities are delivered with a full set of examples running on STMicroelectronics boards.

The STM32Cube HAL is an STM32 embedded software layer that ensures maximized portability across the STM32 portfolio, while the LL APIs make up a fast, light-weight, expert-oriented layer which is closer to the hardware than the HAL. HAL and LL APIs can be used simultaneously with a few restrictions.

Both the HAL and LL APIs are production-ready and have been developed in compliance with MISRA-C[®]:2004 guidelines with some documented exceptions (reports available on demand) and ISO/TS 16949. Furthermore, ST-specific validation processes add a deeper-level qualification.

STM32CubeF7 gathers in one single package all the generic embedded software components required to develop an application on STM32F7 microcontrollers. Following STM32Cube initiative, this set of components is highly portable, not only within the STM32F7 Series but also to other STM32 Series. In addition, the low-layer APIs provide an alternative, high-performance, low-footprint solution to the STM32CubeF7 HAL at the cost of portability and simplicity.

HAL and LL APIs are available in open-source BSD license for user convenience.

2 License

STM32CubeF7 is delivered under the *Mix Ultimate Liberty+OSS+3rd-party V1* software license agreement (SLA0048).

The software components provided in this package come with different license schemes as shown in Table 1.

A set of application projects implementing all the middleware components is also provided in the STM32CubeF7 MCU Package.

Table 1. Software component license agreements

Software component	Owner	License
Board Support Package (BSP)	STMicroelectronics	BSD-3-Clause
Cortex [®] -M CMSIS v5.4.0	Arm Limited	Apache License 2.0
FreeRTOS [™]	Amazon.com, Inc. or its affiliates	MIT
STM32F7 HAL/LL APIs	STMicroelectronics	BSD-3-Clause
LwIP	Swedish Institute of Computer Science	BSD-3-Clause
mbedTLS	Arm Limited	Apache License 2.0
Application projects	STMicroelectronics	Ultimate Liberty (SLA0044)
Example projects	STMicroelectronics	BSD-3-Clause
Demonstration projects	STMicroelectronics	Ultimate Liberty (SLA0044)
STemWin	STMicroelectronics and SEGGER Microcontroller GmbH & Co. KG	Ultimate Liberty (SLA0044)
PDM2PCM Library	STMicroelectronics	Image V2 (object release only) (SLA0044)
USB Host library	STMicroelectronics	Ultimate Liberty (SLA0044)
USB Device library	STMicroelectronics	Ultimate Liberty (SLA0044)
TouchGFX	STMicroelectronics	Ultimate Liberty (SLA0044)
FatFS	ChaN and STMicroelectronics	BSD-3-Clause
LibJPEG	Thomas G. Lane, Guido Vollbeding	Independent JPEG Group License ⁽¹⁾
Utilities (CPU - Fonts - JPEG - Log)	STMicroelectronics	BSD-3-Clause

1. The FatFS License and Independent JPEG Group License are business friendly and permissive open source licenses.

Note: Arm is a registered trademark of Arm Limited (or its subsidiaries) in the US and/or elsewhere.

3 Ordering information

The STM32CubeF7 is available for free download from www.st.com.

Revision history

Table 2. Document revision history

Date	Version	Changes
28-May-2015	1	Initial release.
23-Jun-2017	2	Updated STM32CubeF7 firmware component schematic on cover page. Added low-layer API drivers. Updated document title.
1-Dec-2017	3	Updated title and schematic. Updated Section Features , Section 1 Description and Section 2 License to introduce the 'STM32CubeF7 MCU Package' denomination.
30-Jan-2019	4	Added TouchGFX in Section Features , Section 1 Description and Section 2 License . Updated Section 1 Description to latest version. Renamed STM32CubeF7 MCU Package into Section 2 License and updated content to describe all software component license agreements. Added Arm notice in Section 2 License .
01-Oct-2019	5	Updated Section 2 License .

IMPORTANT NOTICE – PLEASE READ CAREFULLY

STMicroelectronics NV and its subsidiaries (“ST”) reserve the right to make changes, corrections, enhancements, modifications, and improvements to ST products and/or to this document at any time without notice. Purchasers should obtain the latest relevant information on ST products before placing orders. ST products are sold pursuant to ST’s terms and conditions of sale in place at the time of order acknowledgement.

Purchasers are solely responsible for the choice, selection, and use of ST products and ST assumes no liability for application assistance or the design of Purchasers’ products.

No license, express or implied, to any intellectual property right is granted by ST herein.

Resale of ST products with provisions different from the information set forth herein shall void any warranty granted by ST for such product.
